PROFESSIONAL SUMMARY

Finance and Computer Science student with a minor in Economics and experience in business analytics, financial modelling, data analysis, and software development. Skilled in Python, SQL, Excel, and data visualization, with an interest in applying technology and quantitative analysis to practical business problems.

EDUCATION

University of Lethbridge — Lethbridge, AB **Sep 2022 – Present**
Bachelor of Management – Finance | Bachelor of Science – Computer Science | Minor in Economics
Current Co-operative Education student | Relevant coursework: Finance, Economics, Management Accounting, Data Structures and Algorithms, Practical Software Development

SELECTED ANALYTICS & TECHNICAL PROJECTS

Stock Portfolio Analyzer | Python, yfinance, pandas, NumPy, SciPy

- Built an interactive application that accepts up to five stock tickers and an investment amount, retrieves Yahoo Finance market data, and compares performance with the S&P 500.
- Applied Modern Portfolio Theory to calculate expected returns, covariance, volatility, and Sharpe ratios and to construct equal-weight, minimum-variance, and tangency portfolios.
- Generated whole-share allocations, projected portfolio values, benchmark comparisons, and buy/hold/avoid recommendations to support practical investment decisions.

Technical Prototyping Project | 3D Printing, Soldering, Digital Systems

- Designed and produced a 3D-printed jet model and assembled circuit components using soldering and digital systems techniques.
- Tested wiring and board functionality, identifying and correcting issues through systematic troubleshooting.
- Applied iterative testing and quality checks to complete the prototype and strengthen technical problem-solving skills.

Casino Game | C++, GitHub

- Developed an object-oriented game with player movement, inventory management, a storyline, blackjack, slots, and a chip carry-over system.
- Integrated multiple game systems and tested functionality, strengthening software design, debugging, and problem-solving skills.

TECHNICAL & BUSINESS SKILLS

Data & Analytics: Python, pandas, NumPy, SciPy, Matplotlib, Jupyter, Microsoft Excel
Programming & Databases: C/C++, Python, HTML, CSS, PHP, SQL, R, Racket
Finance & Business: Modern Portfolio Theory, financial modelling (NPV, IRR), financial reporting, benchmarking, business analysis
Tools: Git, GitHub, VS Code, PyCharm, Eclipse, JIRA
Communication: Business writing, teamwork, and 15-minute presentations to groups of 30–50 people

WORK EXPERIENCE

Supervisor | Kung Pao Wok — Lethbridge, AB **Aug 2022 – Present**

- Supervise and train 6–10 employees, assign daily responsibilities, and maintain service and safety standards in a fast-paced operation.
- Monitor inventory, coordinate supply orders, and communicate with suppliers to support product availability and cost control.
- Track employee hours for payroll and assist with cash handling, register reconciliation, and daily financial reporting.
- Redesigned menu presentation to highlight higher-margin products and support sales performance.
